

Industry press has credited photoluminescent (PL) pathway markings, installed in the World Trade Center after the initial 1993 terrorist attack, with significantly improving evacuation time during the tragic events of 9/11. Since that time, DHi's revolutionary PL Low Location Exit Path Marking Systems (LLEPM) have been successfully installed in the Pentagon and other Federal government buildings and in commercial buildings as well.

Although acclaimed as highly effective, currently standard top-quality PL safety materials are not always suitable for every building challenge, however, particularly in older buildings where contact surfaces are irregular or highly-worn. That's why DHi's researchers have developed a new, state-of-the-art series of premium PL paint solutions. DHi's AfterGlo® family of photoluminescent (PL) paints now address these special situations and other challenges. They also offer an extremely economical solution to your buildings' safety needs when compared to other safety striping solutions like tape and laminates.

**Additional Advantages of DHi's AfterGlo® PL paint system:**

- No external power source required – the ultimate "green solution"
- Activated by existing ambient lighting
- Fully charges and recharges in minutes
- Can be recharged over and over
- Nonradioactive and nonhazardous
- Extremely bright – visible to dark-adapted eyes
- Extremely durable
- Maintenance-free, saving you money and time
- Very long service life – up to 20+ years
- 100% reliable

Use DHi's AfterGlo® PL paints in place of or in addition to other PL safety materials in stairwells, corridors, group offices and public areas, common areas, and spaces where emergency equipment is stored.

**Who is Defense Holdings, Inc.®?**

DHi® is a dynamic small business dedicated to helping customers – in government or industry – insert and manage new technology. The DHi staff enjoys a reputation earned over many years for technical, managerial and manufacturing excellence. We support our customers with innovative and timely solutions to the complex problems of implementing and managing technology in a demanding and rapidly changing procurement environment.

 Safety Paint**

## AfterGlo® High Performance Blue

- Cost-effective industrial-quality high performance PL paint solution.
- One-coat PL application over white base coating.
- No protective top-coat required.
- Off-white daytime color, unique violet / blue afterglow.
- Pre-mixed pigment never loses its brightness.
- Can be brushed or rolled directly on concrete, wood, metal or painted surfaces.
- Can be used on floors as well as vertical surfaces such as door trim.
- Tough abrasion-resistant acrylic polymer resists wear.
- Easy soap and water cleanup of brushes and spills while paint is still wet.
- When cured, can be washed with household cleaners and a stiff bristle brush.
- Substantially meets New York City MEA Local Law 26 requirements.

## AfterGlo® High Performance Green

- Cost-effective industrial-quality high performance PL paint solution.
- One-coat PL application over white base coating.
- No protective top-coat required.
- Pale-green daytime color, extremely bright green afterglow (requires easy pigment mixing just prior to application).
- Pigment never loses its brightness.
- Can be brushed or rolled directly on concrete, wood, metal or painted surfaces.
- Can be used on floors as well as vertical surfaces such as door trim.
- Tough abrasion-resistant acrylic polymer resists wear.
- Easy soap and water cleanup of brushes and spills while paint is still wet.
- When cured, can be washed with household cleaners and a stiff bristle brush.
- Far exceeds New York City MEA Local Law 26 requirements.

## AfterGlo® Standard Green

- Economical PL solution-in-a-can requires no white base coating.
- One-coat application with no base coat required.
- White daytime color, bright green afterglow.
- Pre-mixed pigment never loses its brightness.
- Can be brushed or rolled directly on concrete, wood, metal or painted surfaces.
- Can be used on floors as well as vertical surfaces such as door trim.
- Tough abrasion-resistant enamel resists wear.
- Easy soap and water cleanup of brushes and spills while paint is still wet.
- When cured, can be washed with household cleaners and a stiff bristle brush.
- Meets New York City MEA Local Law 26 requirements.
