We Engineer Solutions For Complex National Problems

DHi Applies, Innovates, and Transitions a Broad Range of Professional Services and Advanced Technologies to Support National Priority Programs

Science and Engineering Technical Assistance

DHi enjoys a strong 12-year record of providing support to key Government decision makers at key agencies, including:

- Office of Naval Research
- Naval Sea Systems Command
- Office of the Chief of Naval Operations
- Marine Corps Research & Development Center
- Marine Corps Systems Command
- DARPA
- SOCOM
- NSWC Carderock
- DHS Advanced Research Projects Agency
- Housing & Urban Development

The majority of DHi's staff consists of highly-skilled individuals with significant prior experience in the government and the military. We understand how the government builds and executes budgets and programs.

Technology Scouting

DHi's Technology Scouting professionals seek out emerging technologies that offer our customers best-value solutions.

Why Do You Need Technology Scouting?

- Today's fast-paced environment rarely affords program managers the time to research and identify valuable new technologies.

We understand your needs and can help you address critical questions, such as:

- What are my current competencies?
- What tools do I need to address a national problem?
- What technologies are currently in my arsenal?
- How do I match my technologies to solve a national problem?
- What technologies have I already tried that failed to solve my problem?
- What substitute technologies can I employ to achieve a solution, based on cost analysis?
- What funding is available to me?

Planning for Transition

Too many great technologies fail to emerge from the lab and into the hands of the warfighter. DHi understands what it takes for successful Technology Transition Planning. We've successfully transitioned our own technologies into the Fleet and the Force. DHi Technology Transition Support includes:

- Technology vetting
- Technology roadmapping
- Test planning, oversight, and evaluation
- Budget formulation and tracking
- Risk management
- SBIR management support
- Strategic planning
