Introducing

We engineer solutions for complex national problems.

Significant Recognitions:

- 2006** Anne Arundel Tech Council Innovator of the Year Award
- 2003** Principal® 10 Best Award
- 2003** Virginia Fantastic 50
- 2002** DoD Nunn-Perry Award
- 2001** SBA (Richmond) Minority Firm of the Year
- 2000** SBA Tibbetts Award

How can DHi serve your needs and concerns?

We provide acquisition program support and technical expertise to federal Science and Technology organizations, and facilitate the flow of knowledge and information to enhance the quality of the technology products that our customers deliver to end-users. DHi also assists government customers in determining effective ways to transition systems and technologies into acquisition programs from government laboratories to industry.

Whether you're looking for expertise in managing advanced technology initiatives, improving external and internal communications, or maintaining the cutting edge of technological development, DHi can help you find the winning strategy to meet your challenges in:

- Technology Assessments
- Requirements and Effectiveness Analyses
- Acquisition Support
- Technology and Systems Engineering
- Program Organization and Management
- Strategic Planning and Documentation

DHi is also engaged in the application of advanced technology products to resolve national-level problems. Examples include:

- The installation of a superior photo-luminescent material to support the Pentagon Renovation project. This long lasting product exceeds all federal performance requirements and provides essential, no-fail emergency signage and way-finding under conditions of loss of electrical power and/or reduced visibility due to smoke.
- Development and prototype manufacture of high performance metal fiber brushes for electrical motors and generators. The initial application of this electrical component in a U.S. Navy submarine has garnered significant praise for the efficiencies offered by this advanced concept system.

How is DHi so successful?

The reason for our success is simple: we hire highly qualified people and put them to work on challenging and important problems. The members of our team come from senior-level positions in the operations, maintenance, science and technology, and acquisition communities of the federal sector. They are experts in

- System Acquisition Process
- Technology Management
- Systems Engineering
- Program Planning
- Process Re-Engineering
